About Us

SMS 511 Alerts has been Madang's best kept secret since 2001. A Madang based business that is focused on delivering Smart Mobile Solutions. Our business is built upon word of mouth recommendations and it is an honor to be recognized by our clients. Originally known as Zion-X Mobile Computing, its founders first began using SMS in 2005 to broadcast marketing advertisements to customers but soon realized the service had broader applications for Security and Public Safety communication.

The business has now expanded into a communication hub using various online platforms with a head office in Madang, and operations in Lae and Porgera.

We are the preferred choice for small to medium business but also provide solutions to large organizations, schools, churches and individuals looking for ways to connect better with the people that matter most.

Our Strategy

At SMS 511 we take a community approach to using available technology and provide a portable, reliable, high quality and affordable mobile solutions for public safety and disaster preparedness.

Our Values

Our values are just as simple as A-B-C:

Appreciate the value of life and the people that matter most.

Believe that nothing is impossible and tomorrow is the horizon of opportunity.

Committing talent and innovation into sustainable, portable and practical solutions.
